

Grant Thornton

This booklet contains forensic facts and financial information for 2010/11 to help you assess quantum. We hope you find it a powerful tool ...

... that will help you to calculate damages in cases of personal injury, clinical negligence and commercial claims, among other areas.

It is intended to provide general information only and is not a comprehensive or complete statement of the information and issues relating to the calculation of damages.

It should not be used as a substitute for advice in particular cases.

#### Notes

- ①: There was a discontinuity in the methodology for ASHE in 2007, the 2006 figures provided above are restated using the 2007 methodology. Earlier years are not consistent. UK National Statistics have also stated that there are likely to be further discontinuities in the future as the methodology is improved.
- ②: The figures first released for each year are subject to revision at the time of release of the subsequent year's ASHE. Consequently the 2009 figures are provisional figures released on 11 November 2009 and are likely to be subject to revision around November 2010. Revisions may also be made at other times and the office for National Statistics website should be consulted for the most up to date figures.
